workshop organization by Prof Pau Amaro Seoane

To whom it may concern,

I, Dr. Jorge Cuadra, Professor at the Universidad Adolfo Ibáñez in Viña del Mar, Chile, am pleased to confirm that Prof. Dr. Pau Amaro Seoane was the principal organizer of the international workshop "Super-Massive Black Hole Binaries", held in Las Cruces, Chile, from March 4-7, 2014.

This meeting brought together experts in astrophysics and gravitational-wave astronomy to address open questions regarding the formation, evolution, and observational signatures of supermassive black hole binaries. As the lead organizer, Prof. Amaro Seoane played a central role in designing the scientific program, including keynote talks and discussion sessions, coordinating the organizing committee (composed of myself, Patricia Arévalo, Andrés Escala, Stefanie Komossa, Paulina Lira, Alberto Sesana, and Taka Tanaka), and facilitating collaborations between theorists and observers to advance research in this field.

For reference, the meeting's description and participant list can be found here

<https://astro-gr.org/las-cruces-meeting-2014/>

Should you require further details regarding Prof. Amaro Seoane's role in this event, please feel free to contact me.

Sincerely,

Prof. Jorge Cuadra
